PROJECTS

Job Tracking App

taha-amin/job-app

09/2023 - In Progress

- *MongoDB, Express, React, NodeJS, Docker, Github Actions in AWS env.*
 - Developed a dynamic full-stack application using MERN stack
 - Created appealing and responsive React front-end with global styling, integrating React Router for smooth navigation
 - Worked on JWT-based user authentication, password hashing for data security, and authorization
 - Built and refined CRUD functionality, including search, filter, and pagination, using Axios and MongoDB

HindSight

HindSight-frontend

09/2022

- *Ionic Framework, TypeScript, React*
 - Utilised Ionic framework to build a social mobile application where users can share dreams for iOS and Android devices
 - Lead weekly stand-ups to update team on the state of the app
 - Employed responsive design principles to ensure a consistent user experience across various devices and screen sizes
 - Implemented user interface enhancements that contributed a 40% increase in user interaction
